

We offer our signage partners the opportunity to enhance the customer experience and offer better guarantees on our signs. Our Sign-Kontrol® module allows you to optimise the life of your signs by setting their periods of use.

OUR COMMITMENTS

Adjust brightness

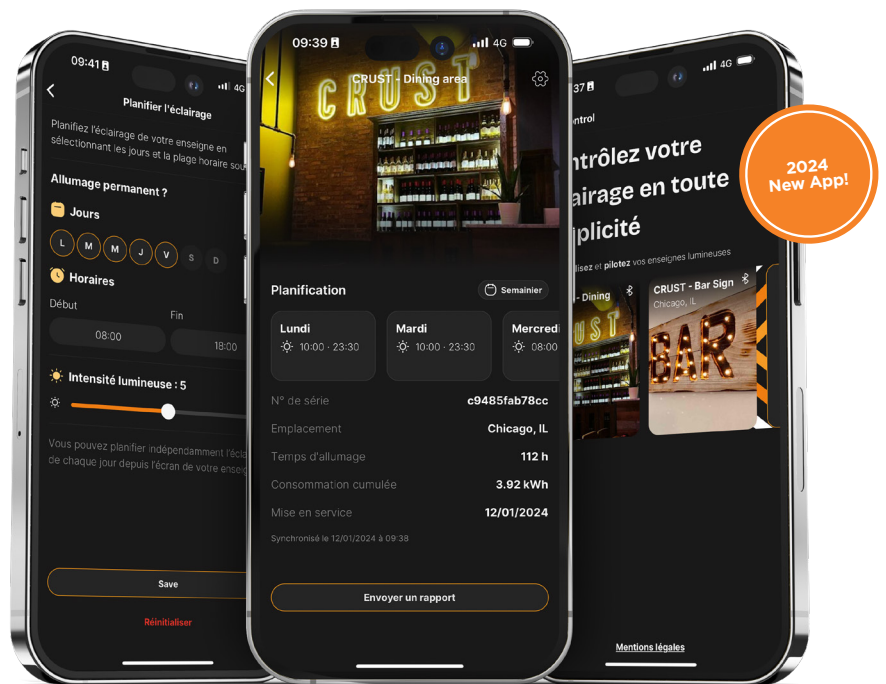

Schedule on and off times

Optimise the lifetime of your signs

Calculate your energy consumption

- + Innovate by offering a 5-year or 10,000-hour guarantee on a Bloc-LED product
- + Adjust the brightness of the sign to its environment
- + Choose the range of uses and adapt easily to regulations
- + Optimise the lifetime of your signs
- + Monitor your sign fleet and control the warranty period

Since 2005, Kalisign has been committed to each sign conception in order to offer the best performance over time. Our signs come with a full guarantee (parts and labour) for the first 5 years, up to a maximum of 10,000 hours.

An outdoor city centre sign:

- + Lighting 2 hours before sunrise (7am to 9am) then lighting 4.30 hours in the evening (6.30pm to 11pm) 6 days a week - 10,000

A shopping centre sign:

- + Lighting 10H / day 6 days / Week - 10,000H after 3 years

HOW IT WORKS

Sign-Kontrol® is placed between the transformer and the signs. This programming module connects to your smartphone (IOS and Android) to offer your customers a simple, effective interface. Your customers can configure their signs on site at the touch of a button.

EASY INSTALLATION

The Sign-Kontrol® module is placed between the transformer and the sign. But don't panic, if you've opted for the Sign-Kontrol® option you'll receive it with your sign already wired. All you have to do is plug your sign into the mains as usual.

A BLUETOOTH CONNECTION

Once you have downloaded the application onto your smartphone, make sure your Bluetooth is activated so that your Sign-Kontrol® can be detected.

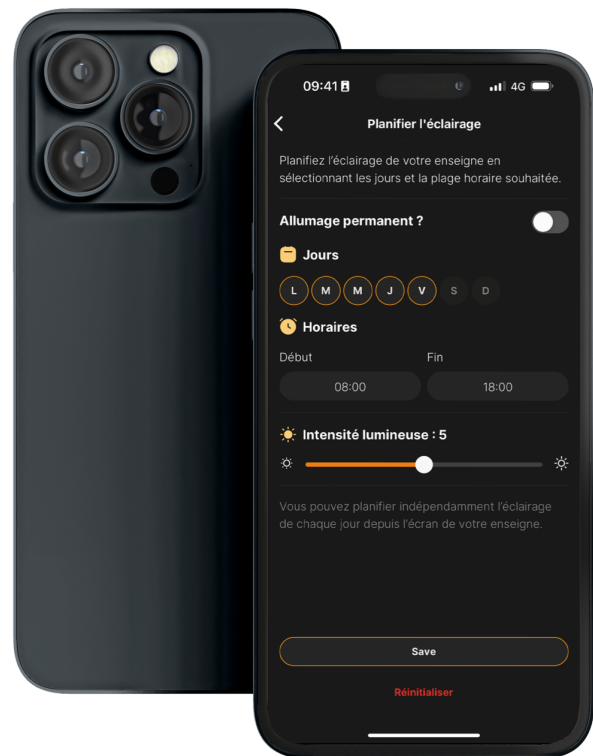

CAUTION: A maximum distance of 15m must be maintained for the Sign-Kontrol® to be detected.

ADJUST THE BRIGHTNESS AND/OR PROGRAMME YOUR TIME SLOTS

Would you like to adjust the brightness of your sign according to the time of day and/or programme time slots according to the days of the week? Thanks to this simple and effective interface, you can adapt your sign to its environment in just one click!

VIEW YOUR HOURS OF USE

You can view your hours of use. This allows you to keep an eye on your warranty. All you need to do is click to send a report by email.

THE KALISIGN SPIRIT

Kalisign is committed to the rational use of signs and their optimal adaptation to the environment. This means that your customers can easily adapt their signs to comply with local regulations on switch-on times and maximum luminance levels.
